(additional hours at customer request)

OUR HISTORY

Established in 1918, we have over 90 years of experience in matching the right coating to the evolving demands of a multitude of industries. Our expertise, research & development and processing best practices are why our customers tell us they turn to us first when faced with tough coatings challenges!

CORE CAPABILITIES

In 7 buildings comprising 90,000 sq. feet, we have extensive metal finishing capabilities. We specialize in the following:

Application of:

Electroplating	Spray Coatings
Electroless Plating	Vacuum Coatings
Anodizing	Combination Coatings
Chemical Conversion Coatings	

Formulation & Manufacturing of:

Surf-Kote® line of Dry Film Lubricants

For the full breadth of our metal finishing processes and specifications we offer, please visit our website.

COMMITMENT TO INTEGRITY

We understand that, as a trusted partner in critical supply chains, every component of our team and service has to exceed expectations. Every day, our customers trust us with the enormous time and financial investment behind their pre-finished hardware. As with any processing, there are risks associated with the service we provide. We work continuously to ensure you are delivered the finish you specify, your coating will perform as designed and we will meet not just the spirit, but the letter of every specification and requirement involved. Your ability to trust us in the handling of your hardware is paramount and we don't take it for granted!

COMMITMENT TO QUALITY

Our quality system, and the team of engineers and inspectors who support it, is second to none in the metal finishing industry.

We are accredited by:

Nadcap Chem Processing and Nadcap Coatings
ISO 9001
AS 9100
NQA-1

Our quality engineering team is highly capable and expeditious in the area of Advanced Product Quality Planning- including PPAP, FMEA, Frozen / Sig Op Plans, etc.

Our quality inspection team is practiced at capturing and meeting all customer quality requirements including gauge requirements and specialty testing requirements.

For current copies of our quality certifications, please visit our website.

COMMITMENT TO DELIVERY

We pride ourselves on getting our customers what they need in the timeframe required. In most cases, that's 3-5 days, but our client testimonials are filled with "while you wait" and under 24-hour turn around times. Let us know what you need. We'll make it happen.

COMMITMENT TO SERVING THE BEST

Market leaders demand excellence in the resources they approve. We are proud to have an expanding list of customers including:

GE Aviation	Hamilton Sundstrand
Rolls-Royce	Honeywell
ATK	Raytheon
Lockheed Martin	General Dynamics
Goodrich Aerospace	Harris
Pratt & Whitney	BAE Systems
Parker Hannifin	Northrup Grumman
NASA	US Dept. of Energy
Cessna	Unison
Messier-Bugatti	Eaton Corporation

About Us

COMMITMENT TO INNOVATION

Combine a continuous improvement culture and the discipline of quarterly operations planning and the result is an organization that gets stronger each day that it functions. Our team works diligently to improve processing equipment, racking/tooling designs and masking techniques to result in higher quality and lower costs for our customers. We have recently invested in a revolutionary parts planning software (RISE) to assure that every job is planned properly to the spec and other detailed quality requirements. Even our support departments have been leveraging today's technology to deliver a leaner organization.

COMMITMENT TO EMPLOYEES

The lifeblood of any service organization is its team members, and Hohman Plating is no exception. This importance shines through beginning in our hiring process, where each candidate experiences a rigorous, multi-step process that involves numerous tests and behavioral interviewing demonstrations. For the few who qualify, their first weeks of work will involve a combination of academic and "hands-on" learning. We know how valuable your hardware is and the trust you place in us to process it. It is for this reason that we accept and retain only the best. Our empowered team takes the steps necessary to serve over 1,200 customers in the processing of their over 35,000 purchase orders. As you would expect with any valuable resource, we go to great lengths to secure the safety, health and continued employment of each team member.

COMMITMENT TO ENVIRONMENT

CONSERVATION

Engineering controls and technology have aided us in minimizing the water, electricity and natural gas required to produce the quality our customers deserve. Our optimization efforts continue to this day.

WATER

Housing an award-winning industrial water pre-treatment plant, we go to great lengths to ensure that the water we return to the City of Dayton POTW is far cleaner than federal and local limits require.

AIR

Our facility has the engineering controls necessary to not only provide clean air for our employees within the campus, but ensure that all discharged air is equally clean and safe.

SOIL

We take the extra time and effort to recycle as much solid and liquid waste as possible out of our facility. We understand the meaning of "cradle to grave" and want our next generation to inherit a clean earth.
